Excellent network of local Accounting firms for additional services			

“Keeping your accounts in order is a vital, and sometimes stressful part of running a small to medium-sized business. And regulation is continually changing.

Many of us have now discharged our auto-enrolment obligations, and we expect the next challenge to be the revised Data Protection Regulations.

Cashtrak Limited is a trusted advisor to many SMEs in London and the Home Counties, and overseas businesses with a presence in the UK. We ensure that we are up to date with the latest developments in our field, and we keep our clients abreast of regulatory changes in plenty of time to comply. [Visit our blog](#) for a selection of recent articles, and connect with me on LinkedIn for the next updates on Data Protection.

We provide a range of award-winning services at competitive prices, and [our customers](#) are very happy with our pro-active and modern approach to their businesses.

We have worked extensively with companies in difficulty, helping with detailed cashflow analysis to keep things on track during the more challenging trading periods. This level of detail has made a huge difference to MDs who need extra support and visibility at such difficult times.

Need some guidance? Feel free to give me a call to discuss your requirements.

**Carol Webb, MD**
